ASHWIN PILLANDA RAVINDRA

Boston, MA | ashwinpr@bu.edu | linkedin.com/in/prashwin | github.com/ashwinpr15 | ashwinpr15.github.io

EDUCATION

BOSTON UNIVERSITY, QUESTROM SCHOOL OF BUSINESS Boston, MA
Master of Science in Business Analytics (STEM) Expected December 2027
Coursework: Introduction to Data Analytics (BA780)
GRE: 330+

SDM INSTITUTE OF TECHNOLOGY (Visvesvaraya Technological University) India
Bachelor of Engineering, Electronics & Communication Engineering (CS) 2021
Coursework: Probability and Statistics, Data Structures Using C++, Object-Oriented Programming, Operating Systems, Digital Signal Processing, Management and Entrepreneurship

PROFESSIONAL EXPERIENCE

TATA CONSULTANCY SERVICES (TCS) Bengaluru, India
Business Intelligence Developer August 2021 – August 2026

- Built 10+ dashboards and reports in Power BI and QlikView for sales, finance and supply chain teams at global clients including Stellantis, Samsung and Bosch
- Automated Stellantis' fleet sales report end to end, from data extraction to the final report, eliminating manual work and saving about INR 70 lakh (~$80K) a year
- Developed PowerApps for data entry, approvals and write-back embedded in Power BI reports
- Migrated 6+ business applications from QlikView to Power BI, rebuilding data models and reports
- Designed data models and SQL transformations that fed enterprise analytics and recurring reporting
- Built data pipelines with Snowflake, Azure Data Factory, Python and Airflow DAGs to automate cloud reporting
- Mentored junior analysts on BI and analytics practices; recognized with the Special Initiative Award (2024), Best Team Awards (2022, 2023) and On The Spot Award (2022), and by Stellantis and Samsung leadership

ACADEMIC PROJECTS

Formula 1 Cost Cap and Competitive Balance, *BA780 team project* Fall 2026

- Analyzed constructor points, wins and podiums for 2010–2025 in Python (pandas, SciPy) to test whether the 2021 cost cap made competition more balanced
- Built a reproducible pipeline on a versioned public dataset with checksum verification; presented 15 charts and stakeholder recommendations

Autonomous Quadruped Robot, *engineering capstone* 2021

- Built a 12-servo, four-legged robot on Raspberry Pi with a creep gait, vision-based obstacle detection in OpenCV and IoT sensor monitoring on ThingSpeak

LEADERSHIP & ACTIVITIES

- **Team Lead**, Questrom course teams (Fall 2026): led two teams, coordinating deliverables, delegating tasks and keeping schedules
- **Volunteer**, Boston University Information Technology: taught IT and programming fundamentals to support onboarding
- Led analytical-thinking workshops for engineering students

SKILLS

BI and reporting: Power BI, Power BI Dataflows, QlikView, Qlik NPrinting, PowerApps, data modeling
Data and cloud: SQL, Snowflake, Azure Data Factory, DB2, Microsoft Fabric
Programming and automation: Python (pandas, NumPy, scikit-learn), Apache Airflow, C++
